B45 SERIES – ADVANCED TRANSMISSION TECHNIQUES

B45 – ADVANCED TRANSMISSION TECHNIQUES

This training system covers the most important subjects of advanced communications.

The collection of training units includes Transmission Line Trainers, Antenna Trainer, a motorized rotating Antenna platform, Fiber Optic Trainer and Microwave trainer.

The units are autonomous, including the power supply, where applicable. Selected experiments allow the student to learn the subjects exhaustively.

Antenna Trainer and Microwave Trainer consist of a basic unit, covering the most important subjects, and are expandable for more advanced topics.

Complete, autonomous and composed by a selection of equipment integrated in order to work together, the system with the proposed composition minimizes the number of equipment required to perform the various experiments.

We list here the units of this training system

B4500	TRANSMISSION LINE DEMONSTRATOR	LEAFLETS
B4510	COAX TRANSMISSION LINE TRAINER	
B4511	CABLE PAIR TRANSMISSION LINE MODEL	

B4520	ANTENNA TRAINER	LEAFLETS
B4521	ROTATING ANTENNA PLATFORM	

B4530-Y	FIBER OPTIC TRAINER	LEAFLETS
B4532	ELECTRO-OPTICS TRAINER	

B4540	MICROWAVES TRAINER	LEAFLETS
B4541	MICROWAVE OPTICS TRAINER	
B4545	MICROSTRIP TRAINER KIT
